## ADDITIONAL SHEET

**CCR #:** 02-0625      **Rev:** —      **Originator:** Maryellen Corbett

**Telephone:** 0703      **Office:** SE

**Title of Change:** Solaris 8 02/02 Common Patch Baseline

Remove all Solaris 8 02/02 baselined hosts from current Solaris 2.5.1 Patch Baseline document. The only hosts that should remain on this document are:

CM Servers at all sites: e0mss02, g0mss02, l0mss01, n0mss02, p0mss02, m0mss02 and t1mss03

The p0xxxxx machines in the PVC (which are being retained until support for 6a\_04 is no longer required.

The xxdrsxx and xxsasxx machines should be removed from the 911-TDA-007 document, although they are not covered in this baseline. These machines required early delivery and were deployed with a Solaris 8 07/01 upgrade. Baselining of these machines is not covered in this patch baseline.
